Managing Aquatic ecosystems and water Resources under multiple Stress

Fact Sheet

Project Information

MARS

Grant agreement ID: 603378

Funded under
FP7-ENVIRONMENT

Project website

Overall budget
€ 11 645 832,84

Status
Closed project

EU contribution
€ 8 996 781,93

Start date
1 February 2014

End date
31 January 2018

Coordinated by
UNIVERSITAET DUISBURG-ESSEN

Germany

Objective

MARS will support managers and policy makers in the practical implementation of the WFD, of related legislation and of the Blueprint to Safeguard Europe’s Water Resources by conducting new research and synthesising existing knowledge concerning effects and management of multiple stressors in surface water and groundwater bodies; by advising the 3rd RMBP cycle and the revision of the WFD; and by developing new integrated tools for diagnosing and predicting multiple stressors in water resource management.

The consortium includes 19 research institutes and five water boards and environment agencies. MARS will engage with ongoing and finalised European initiatives addressing related topics, thus acting as an integrating project. Work will be organised at the scales of water bodies, river basins and Europe; at each scale there is a direct link to water managers and decision makers. Nested within the scale structure, we will employ a suite of methods: flume and mesocosm experiments to better understand the effects of selected stressor combinations with a focus on
