Project description

Increasing security-related research visibility in Europe

The security research National Contact Point (NCP) network seeks to improve and meet the challenges of the security domain. One approach is to reach a broader target group of stakeholders and businesses in the secure societies field. The EU-funded SEREN 4 project aims to boost the capacity and collaboration among secure societies NCPs, while offering support and services to funding programme applicants
and the overall security community. It will conduct capacity-building actions for NCPs and provide tailored services for applicants and security actors to bolster their participation in Horizon 2020 funding opportunities. Moreover, the project will support networking and implement awareness-raising activities within the area of secure societies.
