

Resilient Bio-inspired Modular Robotic Miners

Results

Project Information

ROBOMINERS

Grant agreement ID: 820971

[Project website](#) 

DOI

[10.3030/820971](#) 

Project closed

EC signature date

3 May 2019

Start date

1 June 2019

End date

30 November 2023

Funded under

SOCIETAL CHALLENGES - Climate action, Environment, Resource Efficiency and Raw Materials

Total cost

€ 7 445 900,00

EU contribution

€ 7 445 900,00

Coordinated by

UNIVERSIDAD POLITECNICA DE MADRID

Spain

This project is featured in...

Innovative solutions for sustainable raw materials extraction

CORDIS provides links to public deliverables and publications of HORIZON projects.

Links to deliverables and publications from FP7 projects, as well as links to some specific result types such as dataset and software, are dynamically retrieved from OpenAIRE .

Deliverables

Documents, reports (39)

[Report on Emerging and Converging Technologies](#) 

[Environmental impact assessment](#) 

Environmental impact assessment framework recommendations for ROBOMINERS

[Robominer design report](#) 

Robotics platform design report blueprints and technical details

[Report on perception, sensor-fusion software and navigation software](#) 

[Report on Meta-controller](#) 

[Review document giving scope and examples of deposit types of interest](#) 

[Policy implications & recommendations](#) 

[Final Plan for Sustainability](#) 

[Report on suggestions for higher TRL-research & Pilots](#) 

[Report on laboratory tests on early stage alternative prototypes on locomotion, sensing and navigation in mining environments](#) ↗

Report on laboratory tests on early stage alternative prototypes on locomotion sensing and navigation in mining environments

[Press releases and media kit - 3](#) ↗

Press releases and media kit last release

[Press releases and media kit - 2](#) ↗

Press releases and media kit, second release

[Draft Plan for Sustainability](#) ↗

[ROBOMINER Production tool concepts](#) ↗

[Integrated sustainability assessment framework](#) ↗

[ROBOMINER production tools based on COTS adaptation](#) ↗

[Roadmap for 2030 and 2050](#) ↗

[Final cluster status report](#) ↗

Cluster status report, version 3

[Realtime selective mining report](#) ↗

[Ethical and geoethical considerations](#) ↗

Ethical and geoethical considerations of small-scale robotic mining in Europe

[Software architecture](#) ↗

Software architecture specifications of the robotic system

[System requirements](#) ↗

This document reports the systems requirements of the robotics platform

[Field test report](#) ↗

Report on filed tests and demonstrations

[Conceptual mine geometries and report on studies of bottlenecks and other limiting factors](#) ↗

[Report on new bio-inspired locomotion strategies concepts for mining environments](#) ↗

This deliverable will report on early research work on alternative prototypes for locomotion sensing and navigation in mining environments

[Second cluster status report ↗](#)

Cluster status report, version 2

[First cluster status report ↗](#)

Cluster status report, version1

[Database of European ore deposits relevant for ROBOMINERS ↗](#)

[Macroeconomic studies ↗](#)

[Recommendations by the Focus Group ↗](#)

Report on the recommendations provided by the Focus Group

[Robominer subsystems and components laboratory test report ↗](#)

Report on the robotic miner subsystems and components laboratory tests.

[Laboratory test report ↗](#)

Report on laboratory tests with the robotic platform

[Report on the Public Outreach Actions ↗](#)

[Report on sensor performance and navigation strategies for mining environments ↗](#)

Report on the work related to perception means for robot localisation and navigation

[Miner perception concept report ↗](#)

[Press releases and media kit - 1 ↗](#)

Press releases and media kit, first release

[Capabilities and scalability evaluation report ↗](#)

Evaluation on the scalability of the robotics concept and related capabilities

[Checklist of physical, chemical, and geological constraints on robotic mining ↗](#)

[Availability of upstream/downstream technology solutions for mines to be operated by robominers ↗](#)

Description of the availability of upstreamdownstream technology solutions for mines to be operated by robominers

Websites, patent filings, videos etc. (2)
