Project description

Connecting environmental research infrastructures to support science for society

European environmental research infrastructures are key providers of high-quality digital assets like research data and services. Understanding the Earth needs an
interdisciplinary approach based on harmonised and easy-to-use data and services from the contributing environmental research infrastructures. The overarching goal of EU-funded ENVRI-FAIR is to advance the findability, accessibility, interoperability and reusability (FAIRness) of these digital assets and connect them to the emerging European Open Science Cloud. ENVRI-FAIR targets the development and implementation of a technical and policy framework to overcome discipline boundaries within the ENVRI community. Cross-discipline harmonisation and standardisation, together with the implementation of joint data management and access structures, will facilitate truly interdisciplinary Earth system science that is fundamental to addressing today's environmental challenges.

**Fields of science**

- social sciences > economics and business > economics > production economics > productivity
- natural sciences > biological sciences > ecology > ecosystems

**Keywords**

- Data services
- environmental science
- research infrastructures
- FAIR

**Programme(s)**

- H2020-EU.1.4. - EXCELLENT SCIENCE - Research Infrastructures (MAIN PROGRAMME)
- H2020-EU.1.4.1.1. - Developing new world-class research infrastructures

**Topic(s)**

- INFRAEOSC-04-2018 - Connecting ESFRI infrastructures through Cluster projects

**Call for proposal**

- H2020-INFRAEOSC-2018-2020

See other projects for this call

**Sub call**

- H2020-INFRAEOSC-2018-2
Funding Scheme

**RIA - Research and Innovation action**
