[10.3030/848098](https://doi.org/10.3030/848098)

Project closed

EC signature date

22 November 2019

Start date

1 January 2020

End date

31 December 2024

Funded under

SOCIETAL CHALLENGES - Health, demographic change and well-being

Total cost

€ 5 887 273,75

EU contribution

€ 5 887 273,75

Coordinated by

IRCCS SAN RAFFAELE ROMA
SRL

 Italy

CORDIS provides links to public deliverables and publications of HORIZON projects.

Links to deliverables and publications from FP7 projects, as well as links to some specific result types such as dataset and software, are dynamically retrieved from [OpenAIRE](#).

Deliverables

Websites, patent filings, videos etc. (1)

[REVERT Website](#)

A REVERT website will be designed and maintained, providing open-access to appropriate project information, learning experience for visitors including slides, and publications.

Documents, reports (10)

[Report on assessment and validation of decision criteria suitable to translate biomarker results into clinical practice](#)

Several criteria and statistical approaches will be used to translate the variation of the marker into a decision rule. The criteria most suitable to be applicable in a clinical setting will be validated side-by-side with a standardized procedure - deliverable itself - to lead eventually to a deliverable directory of individual marker-tailored recommended criteria.

["First study subject" approvals package](#)

The approval package will include
1 Final version of REVERT study protocol
2 Registration number of clinical study in EudraCT registry that will allow posting of study results
3 Approvals from ethics committees and national competent authorities for enrolment of first subject in at least one clinical centre
4 Incidental findings policy
The PI will notify to the central IRB the actual beginning of the clinical study represented by the first patient enrolled

[Dissemination and communication activity report 1](#)

Dissemination and communication activity reports will be released at M12 and yearly, thereafter, for the entire project life.

[Report on SOPs for sample collection, processing and storage, including indicators to monitor quality of samples](#)

Standard operation procedures (SOPs) for samples collection, processing and storage may differ in relation to the type of biomarker to investigate. The SOPs will be designed on the basis of both the biochemical characteristics and the expected grade of stability of every biomarker (or biomarker family). The reference criterion for the validation and the optimization of the SOPs will be the grade of conservation of the analyte through the process. Therefore, when requested by fragile biomarkers, SOPs will be delivered in association with appropriate criteria to assess the stability of the analyte.

[Production of shared procedures and choice of the QC material\(s\) for quality monitoring of analytical phases](#)

Suitable quality control materials will be tested for each marker in comparison to the real matrix according to a standardized procedure, that will be matter of a deliverable. A directory of quality control material(s) recommended for every biomarker will be also delivered. A directory of biomarker(s) for which no commercially available/reliable quality control material(s) will be produced.

[Dissemination and communication activity report 4](#) 

Dissemination and communication activity reports will be released at M12 and yearly, thereafter, for the entire project life.

[Dissemination and communication activity report 2](#) 

Dissemination and communication activity reports will be released at M12 and yearly thereafter for the entire project life

[Testing and Optimization of AI Predictors](#) 

This deliverable will contain the results of the testing of the AI predictors on the in-silico and the real world scenario. In particular, this deliverable will report on the use of the Machine Learning models and the in-silico models proposed in Task3.2, tested with retrospective analysis in Task 3.3 and, finally, analyzed in a real world scenario in Task3.5.

[Dissemination and communication activity report 3](#) 

Dissemination and communication activity reports will be released at M12 and yearly thereafter for the entire project life

[Midterm recruitment report](#) 

The PI will periodically and, at any rate when 50% of the study population is expected to have been recruited, notify the IRB of the clinical trial status. The report will include an overview of recruited subjects by study sites, potential recruiting problems and a detailed description of implemented and planned measures to compensate delays, if any, in the study subject recruitment.

Open Research Data Pilot (1)

[FAIR Data management Plan \(DMP\)](#) 

A document structured in various chapters (following the EU instructions) dedicated to: Data Summary; FAIR principles; Resources; Data security; Ethical aspects and other national/funder/sectorial/departmental procedures for data management in use.

Publications

Peer reviewed articles (34) 

[Gene-Mutation-Based Algorithm for Prediction of Treatment Response](#) 

Author(s): Johnson, Heather; El-Schich, Zahra; Amjad, Ali; Zhang, Xuhui; Simoulis, Athanasios; Gjørloff Wingren, Anette; Jenny, Persson

Published in: Cancers, Issue Vol. 14, nr 8, artikel-id 2045, 2022, ISSN 2072-6694

Publisher: Multidisciplinary Digital Publishing Institute (MDPI)

DOI: 10.3390/cancers14082045

[Red-Emitting Polymerizable Guanidinium Dyes as Fluorescent Probes in Molecularly Imprinted Polymers for Glyphosate Detection](#) 

Author(s): Martha Kimani; Víctor Pérez-Padilla; Virginia Valderrey; Kornelia Gawlitza; Knut Rurack

Published in: Chemosensors, Issue 10(3), 2022, Page(s) 99, ISSN 2227-9040

Publisher: MDPI

DOI: 10.3390/chemosensors10030099

[Bacterial protein MakA causes suppression of tumour cell proliferation via inhibition of PIP5K1 \$\alpha\$ /Akt signalling](#) 

Author(s): Toh, Eric; Baryalai, Palwasha; Nadeem, Aftab; Aung, Kyaw Min; Chen, Sa; Persson, Karina; Persson, Jenny L.; Uhlin, Be

Published in: Cell Death and Disease, 2022, ISSN 2041-4889

Publisher: Nature Publishing Group

DOI: 10.1038/s41419-022-05480-7

[Applications of Tumor Cells in an In Vitro 3D Environment](#) 

Author(s): Sylwia Hasterok, Anna Gustafsson, Anette Gjørloff Wingren

Published in: Applied Sciences, Issue 13, 2023, Page(s) 10349, ISSN 2076-3417

Publisher: MDPI

DOI: 10.3390/app131810349

[Irinotecan- vs. Oxaliplatin-Based Doublets in KRASG12C-Mutated Metastatic Colorectal Cancer—A Multicentre Propensity-Score-Matched Retrospective Analysis](#) 

Author(s): Vincenzo Formica, Cristina Morelli, Veronica Conca, Maria Alessandra Calegari, Jessica Lucchetti, Emanuela Dell'Aquila, Marta Schirripa, Marco Messina, Lisa Salvatore, Federica Lo Prinzi, Giovanni Dima, Giovanni Trovato, Silvia Riondino, Mario Roselli, Ferdinandos Skoulidis, Hendrik-Tobias Arkenau, Chiara Cremolini
