The Social INdividual’s Decisions: how are they shaped by group affiliation during collective decisions?

Fact Sheet

Project Information

SIND

Grant agreement ID: 882936

Funded under
EXCELLENT SCIENCE - Marie Skłodowska-Curie Actions

DOI
10.3030/882936

Start date
24 July 2021

End date
20 April 2024

Total cost
€ 174 806,40

EU contribution
€ 174 806,40

Coordinated by
MAX-PLANCK-GESELLSCHAFT ZUR FORDERUNG DER WISSENSCHAFTEN EV

Germany

Project description

Understanding the impact of multi-group affiliation

One of the most immanent human needs is to be accepted by others, to be part of a group, society or circle. However, mechanisms of participation in groups can influence human cognitive processes, such as decision making. Using an interdisciplinary approach, the EU-funded SIND project supports the research that aims to explain specific cognitive processes driven by group-membership leading people to collective decision making. The project will test how being part of a group
can influence one’s processing of information, responsibility or political or gender attitudes. Questionnaires and experiments will be conducted online on a sample of the European population to study and understand the behaviours that lead to phenomena such as the rise of populism or inward-looking policies.

### Fields of science

- **social sciences** > economics and business > economics
- **social sciences** > psychology > social psychology
- **social sciences** > political sciences
- **social sciences** > psychology > cognitive psychology
- **natural sciences** > computer and information sciences > data science > data processing

### Keywords

- Collective decision-making
- group affiliation
- political attitudes

### Programme(s)

**H2020-EU.1.3. - EXCELLENT SCIENCE - Marie Skłodowska-Curie Actions**

**H2020-EU.1.3.2. - Nurturing excellence by means of cross-border and cross-sector mobility**

### Topic(s)

**MSCA-IF-2019 - Individual Fellowships**

### Call for proposal

**H2020-MSCA-IF-2019**
