Netherlands

Project description

International law and resource wars

Conflicts over natural resources are accompanied by demands and pressures in relation to climate change and inequality. Scientists debate the links between resource scarcity and armed conflicts. But an understudied area of critical significance is how international law functions in this arena, where power inequality defines relationships between actors like transnational institutions, governments and peoples. The EU-funded REWA project will focus on the topics of conflict resources and security impacts of climate change, through two case studies. REWA focuses on the role of international law in managing these crises and also on the role different
actors can play within the related legal dialogue. The project will reveal how
distributive justice can be sidelined and inequalities maintained through legal and
institutional arrangements.

**Fields of science**

- social sciences → sociology → governance
- social sciences → political sciences → political transitions → revolutions
- natural sciences → biological sciences → ecology → ecosystems
- social sciences → law → international law
- natural sciences → earth and related environmental sciences → atmospheric sciences → climatology → climatic changes

**Keywords**

- international law
- international peace and security
- peacebuilding
- climate change
- laws of war

**Programme(s)**

- H2020-EU.1.3. - EXCELLENT SCIENCE - Marie Skłodowska-Curie Actions
- H2020-EU.1.3.2. - Nurturing excellence by means of cross-border and cross-sector mobility

**Topic(s)**

- MSCA-IF-2019 - Individual Fellowships

**Call for proposal**

- H2020-MSCA-IF-2019
