Start date
1 August 2020

End date
20 November 2022

Closed project

Project description

Gender and politics in Mongolian religious sites

The Inner Mongolia Autonomous Region is part of the People’s Republic of China. Religious sites such as monasteries and shamanic graves exercise a double function as centres of ritual power and as 'observers' of the way local societies have adapted to the different political and social changes in their territories. The EU-funded MONGOL-GNP project examines how religious sites and related ritual activities reflect gender evolution and political order among the Mongols of Inner Mongolia.
The project will analyse how gender practices have been narrated and exercised during the 20th century to understand the change of indigenous interpretations of gender difference. It will also explore how significant characters and mythical ancestors have redefined the political environment of Inner Mongolia.
