Project description

Communities of practice and migration control actions

The migrant influx has increased the implementation of EU control actions. At the core of these actions stand communities of practice (organised groups of professionals who share a common concern) that elaborate knowledge and implement policy actions. However, the nexus between everyday acquired knowledge, communities of practice and policymaking has not yet been systematically studied. The EU-funded DoMiCoP project will provide answers on how and why communities of practice in the EU develop and diffuse the knowledge needed to activate migration control. The project will identify fields in which communities of practice are formed, analyse them by focusing on the configuration of
actors and institutions involved, and reveal the role non-state institutions play in increasing knowledge about less-studied fields of policymaking and policy diffusion.

Keywords
Communities of practice  Policy implementation  Practical knowledge  Asylum  Immigration Detention  Removal  Non-state actors  Europe

Programme(s)

**H2020-EU.1.3. - EXCELLENT SCIENCE - Marie Skłodowska-Curie Actions**  MAIN PROGRAMME

**H2020-EU.1.3.2. - Nurturing excellence by means of cross-border and cross-sector mobility**

Topic(s)

**MSCA-IF-2019 - Individual Fellowships**
