## Project description

### Understanding the challenges LGBT families face

The EU includes among its priorities LGBT rights as well as the fight against discrimination of gender and sexual minorities. During the last decades, an increasing number of EU member states recognised same-sex marriage and adoption of children by same-sex couples. However, since 2013, while this possibility has been available in France, there are very few children for adoption and assisted

reproductive technologies are so far forbidden for singles and gay couples. By comparing access to parenthood and parental desires among LGBTQ adults in France and in the US, the EU-funded LGBTQ Parenthood aims to increase our understanding of the challenges LGBT families face. It will also analyse the effects of public policies in different countries.
