Habitat choice and preferences of cetaceans in the western Ligurian Sea: insights through telemetry and satellite imagery

Fact Sheet

Project Information

HCAPOC

Grant agreement ID: QLK5-CT2002-51634

Project closed

Start date

11 February 2003

End date

10 November 2005

Funded under

Specific Programme for research, technological development and demonstration on "Quality of life and management of living resources", 1998-2002

Total cost

€ 114 272,00

EU contribution

€ 114 272,00

Coordinated by

UNIVERSITY OF ST ANDREWS
SEA MAMMAL RESEARCH UNIT
 United Kingdom

Objective

Investigation of the habitat use and preferences of cetaceans living in the Western Ligurian Sea, by correlating their presence with satellite derived data and other environmental parameters. Foraging behaviour and migratory movements will also be

investigated through the use of satellite telemetry. The provided information will be used for the management and conservation of these mammals in heavy anthropic habitats.
