TRACKING, TRACING AND MONITORING OF GOODS IN AN INTERMODAL AND OPEN ENVIRONMENT.

Fact Sheet

Project Information

MULTITRACK

Grant agreement ID: TR1040

Project closed

Start date

1 January 1996

End date

31 December 1998

Funded under

Specific programme of research and technological development and demonstration in the area of telematic applications of common interest, 1994-1998

Total cost

€ 3 112 000,00

EU contribution

No data

Coordinated by

BIS Strategic Decisions

 United Kingdom

Objective

MULTITRACK pioneers a telematics system enabling carriers and other users to monitor the location and condition of goods or freight over an entire journey comprising sea, rail and road transport. Existing technologies for goods identification, fixed and mobile data communication, database handling and data relaying will be merged in a value-added network permitting reliable user-friendly access to the

required information. Besides timing the different stages of transport, the system will be invaluable where knowledge of physical conditions is crucial, as in the case of dangerous or refrigerated goods.

Fields of science (EuroSciVoc)

[natural sciences](#) > [computer and information sciences](#) > [databases](#)
