Objective

The aim of SmartSpec is to provide substance, guidance and practical support to the EU Smart Specialisation Platform, based on the combination of leading academic and practical expertise present in the consortium. The goal is directed at operationalising the concept of smart specialisation in a manner which will be useful to actors in different regional contexts. It will do this by strengthening the analytical underpinnings of the smart specialisation concept, providing methodological guidance for practice and generating strategic intelligence for policy-makers. Through an integrated, multi-dimensional and place-based approach focused on 8 Work Packages, SmartSpec develops robust practical and analytical findings to strengthen the implementation of smart specialisation strategies. With a strong emphasis on knowledge exchange and facilitated learning, SmartSpec will deliver useful results to inform practitioners and policymakers in the development and assessment of smart specialisation strategies, whilst extending the state of the art.
