Open Discovery Space

**Project ID:** 297229

**Funded under:** CIP

**Open Discovery Space: A socially-powered and multilingual open learning infrastructure to boost the adoption of eLearning resources**

**From** 2012-04-01 to 2015-09-30, closed project

**Objective**

Open Discovery Space aims to serve as an accelerator of the sharing, adoption, usage, and re-purposing of the already rich existing educational content base. First of all, it will demonstrate ways to involve school communities in innovative teaching and learning practices through the effective use of eLearning resources. It will promote community building between numerous schools of Europe and empower them to use, share and exploit unique resources from a wealth of educational repositories, within meaningful educational activities. In addition, it will demonstrate the potential of eLearning resources to meet the educational needs of these communities, supported by European Web portal: a community-oriented social platform where teachers, pupils and parents will be able to discover, acquire, discuss and adapt eLearning resources on their topics of interest. Finally, it will assess the impact and document the whole process into a roadmap that will include guidelines for the design and implementation of effective resource-based educational activities that could act as a reference to be adopted by stakeholders in school education.
