Objective

GENEVA focuses on high precision road telematics applications. The proposed project emphasises on applications with a social and public dimension and with a high level of innovation i.e. highly Advanced Driver Assistance Systems (ADAS).

The objective of the proposed project is to develop innovative applications for high precision use. The application will provide vital contributions to the adoption of EGNOS / EDAS and to the introduction of Galileo in the automotive market.

The GENEVA applications are summarized under the headline “Urban Assist”, applications of Advanced Driver Assistance Systems (ADAS) for improved safety in urban environments.
